EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Cancel claims 9-12, 16-22, 24, 32-43, 45, 56-59, 63-71, 77-88, 90, 92-96, 98-100, 102, 104-110, and 112 as being directed toward non-elected species.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose nor suggest a wave parameter estimator coupled to a first analysis filter for analyzing the filtered electrical signal and the plurality of electrical signals in first and second frequency bands to provide first and second estimates of a parameter of the wave, as required by independent claims 1, 8, 44, 46, 55, 91, 113, and 114. Newly cited prior art reference Kochanski discloses an apparatus comprising a plurality of microphones generating electrical signals, first analysis filter 102 for providing a filtered electrical signal, signal analysis unit 114, and forward filter (robust signal estimation unit 108). However, the signal analysis unit 114 analyzes the filtered electrical signals in only one frequency band and does not provide first and second estimates of a parameter of the wave. In addition, the cited prior art does not disclose nor propose generating a set of wave parameter estimates that disregard amplitude information of the input signals, as required by claims 89 and 111.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
